## Antibiogram Guidance:

- ❖ The numbers displayed above represent the percentage of organisms susceptible to the specified antibiotic.
- ❖ Antibiogram data helps guide clinicians to choose appropriate empiric antibiotics for many infectious syndromes.
- ❖ Clinical practice guidelines generally recommend selecting antibiotics with > 80% susceptibility for the most likely pathogens.
- ❖ For empiric prescribing guidance please visit [asp.nm.org/northwestern-memorial.html](http://asp.nm.org/northwestern-memorial.html)
